

Announcement

Swiss Luxra announces Strategic Partnerships to Advance Sustainable Energy Solutions.

Swiss engineering excellence meets cutting-edge energy storage technology as Luxra expands into commercial battery systems to address Europe's growing grid capacity challenges

Cham, 2025-07-30; Swiss Luxra Holding AG (Luxra, www.luxra.ch), a leading provider of premium photovoltaic solutions since 2010, today announced the establishment of strategic manufacturing partnerships and the launch of Luxra Storage Solutions B.V., marking a significant expansion into commercial energy storage systems.

Following comprehensive facility audits across the Middle East and Asia, Luxra's management and sales teams have secured partnerships with world-class manufacturers to deliver Swiss-engineered energy storage solutions with just-in-time delivery capabilities throughout Europe.

Addressing Europe's Critical Grid Capacity Challenge

"I see every day how limited grid capacity affects businesses," said Arice Kuijpers, CEO of Swiss Luxra. "At Luxra, we're committed to truly supporting them — not just technically, but also strategically and financially." The announcement comes as European businesses face unprecedented challenges securing adequate power connections, creating significant barriers to growth and sustainability initiatives. From electric vehicle fleet charging to smart storage and distribution systems, companies are increasingly constrained by aging grid infrastructure and lengthy connection approval processes.

Revolutionary Technology Portfolio

Luxra Storage Solutions combines two breakthrough technologies to deliver unmatched performance:

- **Graphene-based supercapacitors:** Offering 50x faster charge/discharge cycles than traditional lithium-ion batteries with 25+ year operational life
- **Advanced LFP (Lithium Iron Phosphate) systems:** Featuring liquid cooling technology and non-flammable chemistry for maximum safety

All systems are - through our system integrators - delivered as turnkey solutions, operational from day one following commissioning, with complete European software integration and no vendor lock-in.

Swiss Engineering Meets Global Manufacturing Excellence

The strategic partnerships enable Luxra to maintain its renowned Swiss engineering standards while leveraging automated production processes and quality assurance protocols verified through direct audits. This approach ensures seamless integration between Swiss precision and cost-effective manufacturing, delivering superior value to European customers.

"Our comprehensive factory audits across multiple continents allow us to provide our clients with unparalleled advisory services," added Jos Schlangen, who manages client relationships for the company. "We don't just supply equipment – we deliver strategic energy infrastructure solutions tailored to each company's growth trajectory and sustainability goals."

The integration with Luxra's existing solar portfolio creates a unique value proposition: complete energy independence through perfectly matched solar generation and storage systems, backed by unified warranties.

About Swiss Luxra

At Swiss Luxra, we are driven by a relentless commitment to impact, innovation, and excellence in renewable energy. Established in 2010, Luxra has evolved into a trusted global provider of comprehensive energy independence solutions, combining high-quality solar photovoltaic (PV) systems with cutting-edge energy storage technology. As a Swiss holding company headquartered in Cham, Canton of Zug, Switzerland, we combine Swiss precision with advanced solar and battery storage solutions to power a more sustainable future.

Our integrated approach encompasses both Luxra's bankable, fully certified solar modules and Luxra Storage Solutions' premium commercial battery systems. From 100kW to multi-MW installations, we deliver complete energy independence—enabling businesses to generate, store, and optimize their renewable energy with unmatched reliability. Both are exceptionally durable and designed to deliver long-term performance and guaranteed output, meeting the highest industry standards.

But we go beyond just producing solar modules and storage solutions—we uphold a strong ethical responsibility throughout our operations. As we pursue B Corp certification, we embed purpose into every solar panel and battery system we deliver. From our manufacturing processes to our supply chain, we ensure compliance with the strictest human rights, environmental, and quality standards.

At Luxra, we don't just follow standards—we set them. We proactively audit our global supply chain to ensure that every partner upholds our core values of integrity, sustainability, and innovation. Whether you're seeking solar energy generation, commercial energy storage, or complete integrated systems, we deliver Swiss quality solutions that transform energy challenges into competitive advantages.

This is who we are, this is who we strive to be, and this is what we stand for: **Complete Energy Independence Through Swiss Excellence.**

Welcome to the next generation of solar. Welcome to the world of LUXRA: www.luxra.ch
